

science, education, art and innovation swissnex Singapore

Dr. Suzanne Hraba-Renevey
swissnex Singapore

swissnex Singapore is a platform of the Swiss Embassy bridging knowledge and competencies in Science, Education, Art and Innovation between Switzerland, Singapore and South-East Asia. It is a member of the Swiss Knowledge Network with outposts in Bangalore, Boston, San Francisco, Shanghai and Singapore.

This innovative platform is implemented in the heart of Biopolis, the new landmark research and incubation center in Singapore, comprising public and private research institutes, governmental offices, SMEs and start-ups.

swissnex Singapore supports the international activities of Swiss institutions of higher learning, research institutes, as well as high tech start-ups in Singapore and the region. It acts as a promotional and bridging tool towards the Swiss education, research and innovation landscape. It operates in synergy with academic, governmental and economic partners, and provides an integrated knowledge network to its users.

swissnex Singapore promotes partnering opportunities by organizing educational fairs, scientific symposia, exhibitions, workshops and panel discussions and offers state-of-the-art working space to partners from Switzerland, in a low risk, low cost, and proximity effective environment.
